## ABOUT US!

SCOP-2024 is the 9<sup>th</sup> edition of the annual Student Conference on Optics and Photonics. Over the years, SCOP has served as an avenue for the exchange of scientific ideas and fostered collaborations between students, researchers, and scientists working in various domains of optics. SCOP – 2024, spanning over three days, will bring together a diverse range of ideas and discussions, existing at the frontier in the research field of optics such as nonlinear optics, ultrafast optics, and quantum optics.

The program also includes discussion on research at PRL, visits to various optical science laboratories at PRL, and interaction with OPTICA Student Chapter.
